

Keep Sedona Beautiful Photography Event

June 8, 2016

Jim Peterson, American Commercial and Fine Art Photographer

If you are interested in learning how to use your digital camera to take photographs of the night sky, Jim Peterson, an American commercial and fine art photographer, will be giving a hands-on workshop prior to the Big Park/Village of Oak Creek star party.

Jim's workshop will begin with a classroom session from 4:00 p.m. to 5:00 p.m. on June 8th at the Keep Sedona Beautiful (KSB) building in Sedona. The workshop will include essential information such as what camera to use, how to set your camera for night sky images, how to focus in the dark, and how to process night sky images.

Following the classroom portion of the workshop, attendees will be invited to bring their cameras to the Big Park/Village of Oak Creek star party at the Sedona Collective, where Jim will help attendees photograph the Milky Way.

The workshop costs only \$10 per person, and is free to Sedona Camera Club members and KSB members. Registration is limited to 30 students; please call Jim at (928) 554-4340 to register.
